DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 15-26, 76, drawn to a method of developing a technical standard in the process of product development, classified in class 705, subclass 11.
 - II. Claims 27-52, 53-74, 75, drawn to a method of specifying a product, classified in class 705, subclass 1.
 - III. Claim 77, drawn to a database, classified in class 707, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III and I/II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the database as claimed can be used for other materially different process.
3. Moreover, if applicants elected group I and II, applicant is further requested to pick either invention I or II because the inventions are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, they have different modes of operation or different functions or effects.

Art Unit: 3629

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to the office of the attorney on 12/22/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3629
